

## TRAINING SOLUTIONS

AM2 is an industry assessment that recognises an individual's professional electrotechnical competence. As well as being a compulsory assessment for an apprentice, the test is also a professional industry standard that has become the requirement for many employers when looking to recruit new electricians.

The content, structure and the marking of the assessment is designed to evidence that a candidate has developed and gained the relevant competencies and skills throughout the training process.

Once training has occurred, the candidate can then enter the assessment centre. The Trafford College AM2 centre provides the electrical industry with high quality and competent electricians.

### WAYS WE CAN SUPPORT YOU

Trafford College has invested heavily in a AM2 centre that has raised the standard of skilled electricians across the Greater Manchester region.

The National Electrotechnical Training (NET) approved facility is based at STEM campus in Stretford and benefits from being installed with the latest equipment, setting a new standard in the region.

The centre set out in a very similar manner to many college workshops to create a familiar environment for the candidates. There is an internal break room and a water fountain within the centre and the college has a cafeteria to purchase food and refreshments. The centre is located in the Stretford campus just 5 minutes from the M60 and has ample car parking.

### PREPARATION DAYS (OPTIONAL IF REQUIRED)

We also offer preparation days in our new refurbished preparation centre. This is not intended to teach skills but is designed to allow the candidate to fine tune existing skills and prepare for the assessment.

This covers all aspects of the assessment including inspection and testing, The use of permitted publications, Fault finding and recording information and a refresh on conduit if required for AM2S. This is intended to build confidence and prepare the candidates for the assessment.

### ASSESSMENTS OFFERED ARE AM2, AM2S AND AM2E

**AM2** is for existing framework apprenticeships, JIB mature candidate route and those following the Level 3 NVQ route.

**AM2S** is for standards apprenticeships only. (End Point Assessment)

**AM2E** is for the new Experienced Worker Assessment route. It can also be used by candidates that currently hold an old AM2 who are using the experienced worker route. (These candidates will complete a short unit of assessment rather than the full assessment)

### ADDITIONAL TRAINING SOLUTIONS

We can also offer re-sits of all sections of the assessments as required.

For detailed information of the assessments please see for:

### EMPLOYERS WE WORK WITH

We work with many colleges and training providers offering a high quality preparation and assessment process. Most of these providers complete their own apprenticeship training and then utilise our centre for the assessment.
