

## TRAINING SOLUTIONS

The UK has one of the strongest and most productive life sciences industries in the world, generating turnover of over £56 billion per annum.

There is significant opportunity to be grasped, with global health and life science markets predicted to grow up to 10 per cent per annum in the next decade. Skills is an increasingly important part of the picture. It is essential that the sector continues to have access to a highly skilled R&D, manufacturing and technical workforce in order to achieve its potential, maintain the UK's position at the forefront of life sciences and help to meet the challenge of addressing the productivity gap.

We work with our employer partners to identify skills gaps so that they are better prepared for the challenges and opportunities in the sector, both now and in the future.

### WAYS WE CAN SUPPORT YOU

There are a number of ways we can help you to develop your people and organisation. We've listed a few of these below, and through a bespoke training needs analysis we can work with you to identify exactly how we can support you:

- Join our Employer Advisory Boards to help co-create the qualifications and services we offer
- Secure free training through government initiatives such as the new, 'Skills for life' scheme.
- Access distance learning short courses and free staff resource.
- Get guidance and information on government incentive payments, Higher Education and professional qualifications tailored to the hospitality sector
- Access work experience and placement opportunities to provide you with extra resource
